**NEWSPRINT ANNOUNCES PUBLISHING PARTNERSHIP**

The National Foundation for Infectious Diseases (NFID) and Lippincott Williams & Wilkins (LWW) are pleased to announce the formation of a new publishing partnership. LWW, a part of Wolters Kluwer Health, is a leading provider of information and education to health care professionals, and institutions in medicine, nursing, allied health, and pharmacy.

Under the new arrangement, LWW will publish NFID’s quarterly newsletter, *The Double Helix,* in the online version of *Infectious Diseases in Clinical Practice,* in addition to publishing services to meet the information needs of healthcare professionals that aren’t met by their existing print publication. Other features include: "Images in ID,” “What’s the Diagnosis?” and Clinical Guidelines.

“I am excited by the opportunities that our partnership will bring,” said Sharon Cooper-Kerr, NFID executive director. "By partnering with NFID, LWW will gain access to one of the leading journals in the field. We are excited by the opportunities that our partnership will bring to open up to publish and distribute important medical information,” said Kim Jensen, Senior Publisher, Medical journals, for Wolters Kluwer Health.

Under the editorial direction of Thomas M. Fiore, MD, MPH, National Clinical Practice, *Infectious Diseases in Clinical Practice* is geared toward providing clinicians with clinically oriented information that will affect their daily practice. Each biannual issue features original research, reviews, scholarly analysis, and case reports covering critical topics. Other features include: "Images in ID," "What’s the Diagnosis?," and Clinical Guidelines.

"We are pleased to establish this very important partnership with LWW," said Len Novick, Publisher, Medical Journals, for Wolters Kluwer. "The opportunities that our partnership will provide us with an opportunity to extend our content reach internationally and in defining the discipline of infectious diseases as we know it today. Dr. Fiore is a pioneer in the diagnosis, treatment, and epidemiology of infectious diseases; he is the developer of the discipline of infectious diseases in adolescents. His work is a source of pride for all of us who are engaged in the field. Dr. Fiore has been honored with the being the first to define the epidemiology of Systemic Inflammatory Response Syndrome (SIRS), the first to create a nationwide surveillance program for sepsis, the first to create a national surveillance program for sepsis, and the first to create a national surveillance program for sepsis. Dr. Fiore has been honored with the being the first to define the epidemiology of Systemic Inflammatory Response Syndrome (SIRS), the first to create a nationwide surveillance program for sepsis, and the first to create a national surveillance program for sepsis. histoire...
Dr. Jennifer L. Howse accepts the 2010 Jimmy and Rosalynn Carter Humanitarian Award.

Wenzel has done. Dick once said ‘you can always spot a leader because they’ve entered a hospital today you are entering democracy, protect human rights, prevent war, unleash educational and economic opportunity, and promote the health and well-being of every person on this planet.’

Then the Jimmy and Rosalynn Carter Humanitarian Award is named for Mrs. Howse by the Carter Center that the Jimmy and Rosalynn Carter Humanitarian Award is named for Mrs. Howse by the Carter Center. Dr. Howse, who continues to carry out the vision of the Carter Center, a non-profit, nonpartisan organization for the advancement of peace, health, democracy, and social justice, continues to lead the Jimmy and Rosalynn Carter Humanitarian Award, which is a "magical thinking" award. The award recognizes individuals who have served in leadership roles, in various capacities, in the field of health or medicine.

The Jimmy and Rosalynn Carter Humanitarian Award was established in 2001 by the Carter Center and the National Foundation for Infectious Diseases (NFID). The award is presented annually to an individual who has made significant contributions to the fight against infectious diseases.

The Jimmy and Rosalynn Carter Humanitarian Award winner in 2010 was Dr. Jennifer L. Howse. Dr. Howse, who has served as the President of the NFID, is a champion in the fight against infectious diseases. She has served as a leader in the field of infectious diseases and has been recognized by the Carter Center and the National Foundation for Infectious Diseases for her contributions to the fight against infectious diseases.

Dr. Howse was honored with the Jimmy and Rosalynn Carter Humanitarian Award at the 2010 Jimmy and Rosalynn Carter Humanitarian Award Dinner held in New York City. The event was co-hosted by the Jimmy and Rosalynn Carter Humanitarian Award co-founder and co-chairman, Dr. Charles R. Drew, and the Carter Center's President, Dr. Jane Elissa Brown.

President-Elect ...........................William Schaffner, MD
President ........................................ George C. Hill, PhD

National Foundation for Infectious Diseases (NFID) is a non-profit, tax-exempt 501(c)(3) public foundation established in 1989 to provide education and support for patients, families, and health professionals. The foundation is a leader in the field of infectious disease education, offering programs and resources for the public, clinicians, and public health professionals. It is dedicated to improving the health and well-being of individuals and populations worldwide by providing accurate, timely, and relevant information on infectious diseases. The goal of NFID is to help people protect themselves from infectious diseases, their complications, and those who are already infected. NFID offers a range of resources, including educational materials, webinars, and online courses, to help individuals and communities stay informed about the latest developments in infectious disease research and treatment. NFID is supported by philanthropic contributions from individuals, foundations, and companies. To learn more about NFID, visit www.nfid.org.

The Jimmy and Rosalynn Carter Humanitarian Award
The Jimmy and Rosalynn Carter Humanitarian Award is named for President Jimmy Carter and his wife, Rosalynn Carter, who are co-owners of the foundation. The award recognizes individuals who have made significant contributions to the field of infectious disease and who are dedicated to improving the health and well-being of individuals and populations worldwide. The award is given annually to an individual who has demonstrated outstanding leadership in the field of infectious disease and who has made a significant impact on the health and well-being of others. The award was established in 1989 to honor the memory of President Jimmy Carter and his wife, Rosalynn Carter, who have dedicated their lives to improving the health and well-being of individuals and populations worldwide.

President Ford Award
The President Ford Award is given annually to an individual who has made significant contributions to the field of infectious disease and who has made a significant impact on the health and well-being of others. The award was established in 1989 to honor the memory of President Jimmy Carter and his wife, Rosalynn Carter, who have dedicated their lives to improving the health and well-being of individuals and populations worldwide.

National Hispanic Medical Association (NHMA)
The NHMA is dedicated to improving the health of Hispanics in the United States through advocacy, education, and support. The organization is committed to addressing the health disparities that exist among Hispanics and to promoting health equity for this population. The NHMA advocates for policies that address the social determinants of health and works to ensure that Hispanic communities have access to quality healthcare services.

Screening for Childhood Influenza
The screening for childhood influenza is an important component of the national influenza vaccination campaign. It is designed to identify children who are at risk of developing influenza and to encourage their vaccination. The campaign is led by the Centers for Disease Control and Prevention (CDC), in collaboration with the American Academy of Pediatrics (AAP), the American College of Obstetricians and Gynecologists, and other national health organizations.

The screening for childhood influenza aims to identify children who are at risk of developing influenza and to encourage their vaccination. It is designed to help parents and caregivers make informed decisions about influenza vaccination for their children. The campaign is led by the CDC and is supported by a wide range of national and local partners, including the AAP, the National Association of County and City Health Officials (NACCHO), and the National Association of State Public Health Officials (NASPHO).

Online Adolescent Immunization Resource Now Available
The National Foundation for Infectious Diseases (NFID), in conjunction with Medscape, is pleased to announce a new online resource and education program for adolescents’ immunization.

Title: A New Era in Adolescent Immunization
This 50-page guide provides an overview of the importance of adolescent immunizations and provides age-appropriate information to help increase immunization rates in this population. Sections include: "Vaccines Preventable Diseases in Adolescents’ Disease, Epidemiology, Risk Factors, and Transmission and Treatment," which provides an overview of current immunizations, disease, influenza, pertussis, hepatitis, meningococcal disease, and pneumococcal infection; "US Adolescent Immunization Strategies for Vaccine-Preventable Diseases" – highlights current scientific recommendations and coverage rates for adolescent vaccines by the U.S. and "The Challenge of Adolescent Immunization" – provides target-group strategies to increase vaccination rates in adolescents.

Written by an expert in adolescent immunization, the guide takes the reader through some of the key concepts. Dr. Richard P. Wenzel, MD, Professor of Medicine at the University of Pittsburgh, provides an overview of meningococcal epidemiology, and Susan Black, MD, Professor of Clinical Pediatrics at the University of Kentucky College of Medicine and the University of Louisville Medical School, provides insights into adolescent health care and strategies for immunization.
