WHAT IS MEASLES?
Measles is a highly contagious respiratory disease that can result in severe, sometimes permanent complications including:
- PNEUMONIA
- BRAIN SWELLING
- HOSPITALIZATION
- DEATH

About 1 in 5 people in the US who get measles will be hospitalized.
As many as 1 in 20 children with measles get pneumonia.
1 out of every 1,000 people with measles will develop brain swelling, which could lead to brain damage.
As many as 3 out of 1,000 people with measles will die, even with the best care.

WHAT ARE THE RISKS?
Measles is highly contagious, and spreads easily when an infected person breathes or coughs.
