

# Influenza Vaccination Coverage by Population

■ 2018–2019 season ■ 2019–2020 season

Receipt of ≥1 dose of influenza vaccine during the season

Source: Centers for Disease Control and Prevention

While flu vaccination coverage increased overall during the 2019–2020 season, rates did not increase significantly for Black or Hispanic people, highlighting the need to address continued deep racial/ethnic disparities.

**Vaccination is the best way to protect against flu and related complications**
