VACCINES AREN’T JUST FOR YOUNG CHILDREN

ADOLESCENTS CAN BE PROTECTED FROM 14 DEADLY DISEASES

KNOW THE RISKS

- HPV causes 27,000 cancers in the US each year in both males and females
- In the US, 1 in 3 whooping cough (pertussis) cases occur in adolescents age 11-19 years
- 21% of US meningococcal disease cases occur in adolescents age 11-24 years; 10-15% will die
- Influenza affects 5-20% of the US population and causes hospitalizations and death

Talk to your healthcare professional about which vaccines are right for adolescents
