VACCINES AREN’T JUST FOR CHILDREN
ADULTS CAN BE PROTECTED FROM DEADLY DISEASES

KNOW THE RISKS:

- Up to a month of missed work or school days
- Millions of hospitalizations and hundreds of thousands of deaths
- Tens of thousands of illnesses and permanent disabilities
- Spreading diseases to the most vulnerable—children and older adults

Hepatitis A  Shingles  COVID-19  Hepatitis B
Diphtheria  Whooping Cough
HPV  Mumps
Rubella  Tetanus
Chickenpox  Pneumococcal Disease
Meningococcal Disease  Measles
Influenza (Flu)

Talk to your healthcare provider about which vaccines are right for you
