Key Facts about Respiratory Syncytial Virus

Do You Know?
Respiratory syncytial virus (RSV) is a common respiratory virus that infects the nose, throat, lungs, and breathing passages.

Symptoms of RSV
It can be hard to tell the difference between RSV, COVID-19, and flu as symptoms may be similar:

- Coughing
- Runny Nose
- Fever
- Sneezing

Who Is Most at Risk of Serious Complications from RSV?
- Older Adults
- Young Children
- Immunocompromised People
- Premature infants

Help Prevent RSV
- Wash your hands with soap and water
- Cover coughs and sneezes
- Clean frequently touched surfaces
- Avoid close contact with others who may be sick
- Stay home when you are sick
